Dilation is a transformation, that stretches or shrinks the original figure presented on the grid based on the scale factor. Included here are umpteen printable worksheets to help 8th grade and high school students hone in on finding the scale factor, identifying the dilation type, determining the new coordinates and drawing the dilated shapes with the center as origin. Recapitulate the concept with the dilation revision pdf worksheets presented here. Sample our free worksheet to test your skills. Printing Help - Please do not print worksheets with grids directly from the browser. Kindly download them and print. Writing the Scale Factor Keenly observe the figures A and B on the coordinate plane, and find the scale factor based on their measures in the worksheets featured here. Identifying the Type of Dilation Identify whether the dilation is an enlargement or a reduction in these two-part worksheet pdfs. A scale factor less than one indicates reduction while a scale factor greater than one represents enlargement. Finding New Coordinates - Type 2 Figure out the vertices of the dilated figure using the scale factor. Draw the dilated image on the xy-plane to complete the exercise. Drawing the Dilated Shapes Each printable dilation worksheet for grade 8 and high school encompasses six unique shapes on the grid. In reference to the center of dilation and the scale factor, plot the new coordinates to draw the dilated shapes. Describing Rotations Describing Rotations Strengthen students' understanding of rotations on the coordinate plane with this eighth-grade geometry worksheet! Describing Reflections Describing Reflections Deepen students' understanding of reflections on the coordinate plane with this eighth-grade geometry worksheet! Describing Dilations Describing Dilations Help students deepen their understanding of dilations on the coordinate plane with this eighth-grade geometry worksheet Describing Translations Describing Translations Deepen students' understanding of translations on the coordinate plane with this eighth-grade geometry worksheet! Pedro's Pool Party: Geometry Performance Task Pedro's Pool Party: Geometry Performance Task In this performance task, students will transform Pedro's backyard by translating, rotating, reflecting, and dilating the objects to fit specific parameters. Dilations on the Coordinate Plane Dilations on the Coordinate Plane In Dilations on the Coordinate Plane, students will practice graphing images of figures after completing given dilations, all of which are centered at the origin. Translations on the Coordinate Plane Translations on the Coordinate Plane In this eighth-grade geometry worksheet, students practice graphing images of figures after completing translations on a coordinate plane. Rotations on the Coordinate Plane Rotations on the Coordinate Plane Students practice graphing images of figures after completing rotations of 90°, 180°, or 270° counterclockwise around the origin. Reflections on the Coordinate Plane Reflections on the Coordinate Plane This eighth-grade geometry worksheet gives students practice graphing images of figures after completing given reflections on coordinate planes.
